S&P 500 Sector Rankings: Top 10 Companies per Sector, with Investment Theses

Eleven sectors, 138 liquid S&P 500 names scored, a thesis for each sector, and an explicit read-across to your current exposure.

Oct 30, 2026	$1.71M	v63	James Wilbur
DATA AS OF CLOSE	PORTFOLIO NAV (MARKED)	PORTFOLIO FILE (OCT 16)	PREPARED FOR (PM)

1. Executive summary

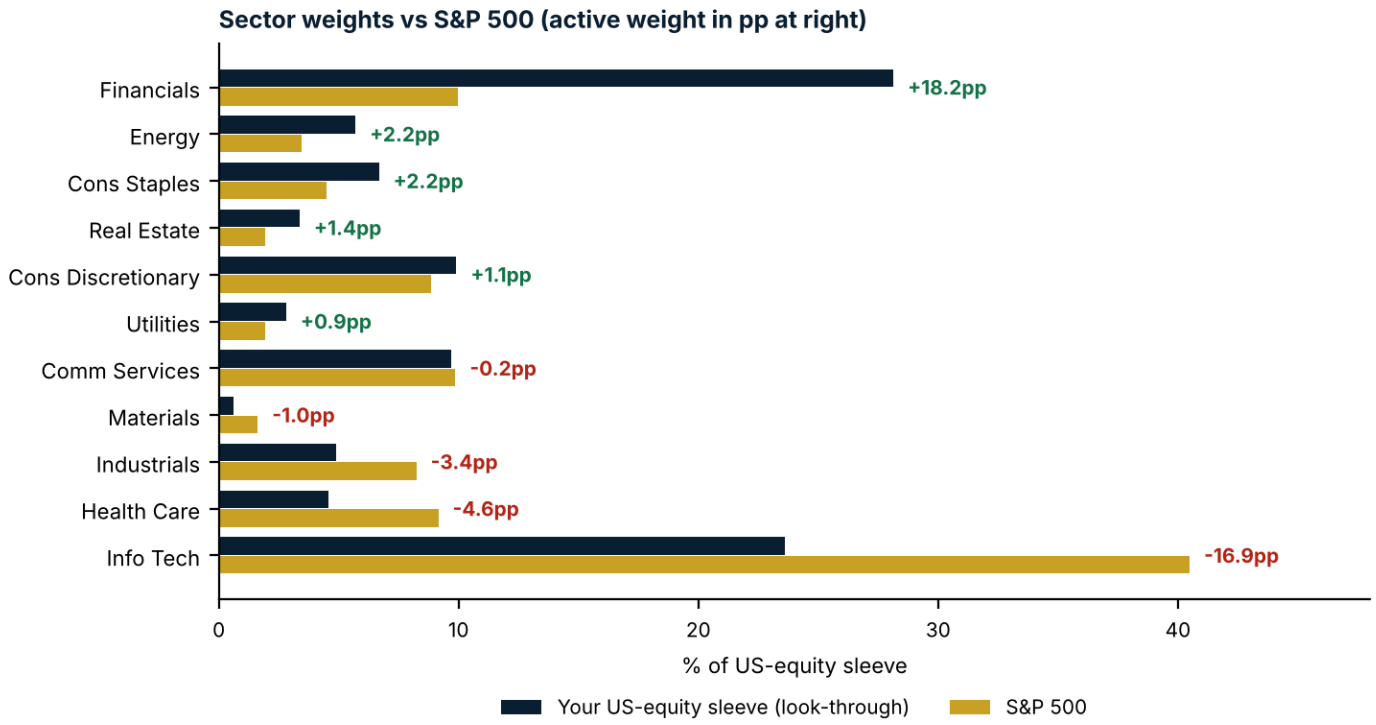

Bottom line. Your portfolio is the mirror image of the index: **Financials are 28% of your US-equity sleeve vs 10% for the S&P, while Information Technology is 24% vs 40%**. The growth mandate (the $80K pension already covers income) argues for closing the technology, industrials and health-care gaps with quality compounders, not for adding to the financials and defensive positions you already own. The market is giving you the chance: tech de-crowded sharply in October, and the deepest opportunity sets now sit in **technology, industrials and consumer discretionary (Amazon, Booking)**, with communication services (Alphabet) close behind, while energy and staples offer the thinnest value.

3.75–4.00%	~85%	~5.0%	Brent >$100
FED FUNDS, HELD OCT 28 (10–2)	ODDS OF DEC 9 HIKE (FUTURES)	10-YR TREASURY (OCT 28)	HORMUZ DISRUPTION; CPI 3.7%

- **Regime.** Stagflation-lite: headline CPI of 3.7% (energy +20%), a Fed that held with two dissents *for a hike*, and a 10-year near 5%. Energy is +52% YTD, tech fell 7.7% in the week of Oct 12–16, Alphabet fell ~12% on Oct 29, and semis dropped another 4–11% on Oct 30 in our quotes (cause not verified).
- **Where the opportunity set is richest** (average of each sector's top five scores, section 3): Information Technology, Industrials, Consumer Discretionary, Communication Services. **Thinnest:** Energy and Consumer Staples.
- **Cross-sector view.** NVDA, MU, MSFT, AMZN, AVGO, GEV and BKNG screen best, but the model is relative: scores compare names within a sector, so the cross-sector table is indicative only.
- **Priority for new money.** Per your existing order, close the VXUS/AVUV gap first (about **$182K** vs 10%/5% targets), then use the sector research below for any remaining capital.

- **Method disclosed.** The 'top 10' is a ranking within an analyst-selected pool of 10–14 liquid names per sector, not an exhaustive screen of all 500. Quality and growth is my judgment (30% weight); the rest is market data.

Your sector exposure vs the S&P 500 and the stance

Sector	Direct %NAV	Funds %NAV*	Total %NAV	% US sleeve	S&P 500	Active	Stance
Information Technology	17.3%	4.1%	21.4%	23.6%	40.5%	-16.9pp	Underweight, add selectively
Financials	23.2%	2.3%	25.5%	28.1%	10.0%	+18.2pp	Overweight, hold, no new capital
Communication Services	7.8%	1.0%	8.8%	9.7%	9.9%	-0.2pp	Neutral
Health Care	2.5%	1.6%	4.2%	4.6%	9.2%	-4.6pp	Underweight, build selectively
Consumer Discretionary	7.3%	1.7%	9.0%	9.9%	8.9%	+1.1pp	Neutral, hold AMZN
Industrials	1.8%	2.6%	4.4%	4.9%	8.2%	-3.4pp	Underweight, add compounders
Consumer Staples	5.2%	0.9%	6.0%	6.7%	4.5%	+2.2pp	Overweight, hold, no new money
Energy	4.1%	1.0%	5.2%	5.7%	3.5%	+2.2pp	Overweight, hold, no adds
Utilities	2.1%	0.5%	2.5%	2.8%	1.9%	+0.9pp	Neutral, own generators
Materials	0.0%	0.6%	0.6%	0.6%	1.6%	-1.0pp	Small underweight
Real Estate	2.5%	0.5%	3.1%	3.4%	1.9%	+1.4pp	Neutral, digital infra only
Non-US equity / bonds / cash	–	–	9.4%	–	–	–	VXUS 2.6%, cash 2.5%, TLXIX non-US/bond share

Marked to Oct 30 closing prices where a live quote was available (single stocks); funds and ADRs not quoted are held at their v63 values. *Fund look-through uses indicative sector mixes (VFFSX and 55% of TLXIX at S&P 500 weights per SPY data; mid, small, dividend and grid funds approximated); US-equity sleeve = NAV less cash, VXUS, TLXIX non-US and bond share (90.6% of NAV). S&P weights from SPY holdings data; real estate was not reported by the source and is assumed ~1.9%, all weights rescaled to 100%.

Priority list for incremental capital (sector research, not trade orders)

Name	Sector	Score	Held	Why it fits	Constraint / sizing note
NVDA NVIDIA	Info Tech	**87.5**	0.7%	Highest score in the study and a 0.7% position; the cleanest "quality at 27x" in tech.	Counts toward the AI cluster (6.8% of NAV today). Stage in thirds given Oct 30 volatility.
MSFT Microsoft	Info Tech	**78.0**	3.0%	Latest print (Oct 28) validated AI monetization, with Azure ~+48% (press); 28x trailing.	Thin consensus upside (+21%); already 3.0% of NAV, so a measured add.
GEV GE Vernova	Industrials	**74.8**	1.5%	Backlog-driven power and grid compounder; held and ranked #1 in Industrials.	AI-power overlap; holds at 1.5% so room exists, but add against cluster limit.
CAT Caterpillar	Industrials	**63.5**	–	Industrials gap closer outside the AI-power factor; 41% consensus upside, ~42% off the high.	New position; cyclical. Starter-size and scale.
UNH UnitedHealth	Health Care	**62.8**	1.2%	Health Care gap closer: 17% upside at 23.5x; 25 of 30 Buy; held at 1.2%.	Policy and medical-cost trend; position-size discipline.
LLY Eli Lilly	Health Care	**62.9**	–	Best business in Health Care (quality 9.5/10), but at 95% of its range with ~3% upside.	Quality at full price: stage over time or wait for a pullback.
BKNG Booking Holdings	Cons Discretionary	**74.4**	–	Best value-plus-quality in Consumer Discretionary outside AMZN; 3% of 52-week range, 16.6x.	New position; travel is cyclical. Funds the sector without adding Amazon.
GOOGL Alphabet	Comm Services	**72.4**	2.4%	#1 in Communication Services at 15x after the Oct 29 reset (held as GOOG 2.4%).	Wait for evidence on search-ad growth and capex before adding.

Not adding: AMZN (7.3%) and JPM (7.0%) are near the top of your 6–8% soft cap; AAPL ranks last of 14 in tech; XOM ranks last of 12 in Energy and trades above its mean target; the financials weight should dilute, not grow. Staples (KO, PM, PEP) are holds.

2. Market backdrop: what changed in October

Rates and inflation. The Fed held at 3.75–4.00% on Oct 28 by a 10–2 vote; both dissenters (Governor Cook and Cleveland Fed's Hammack) wanted a 25bp hike. September CPI was 3.7% y/y (core 2.6%, energy +20.4%); futures implied ~85% odds of a hike on Dec 9. On Oct 28 the 10-year was ~5.04% and the 30-year ~5.37% intraday (Admiral Markets).

Oil. Disruption in the Strait of Hormuz has kept Brent above $100 (≈$117 on Oct 23, then -6% on Oct 26) and WTI above $100 in the week of Oct 19–23. Energy is +52% YTD.

Equities. The S&P 500 hit a record on Oct 6 and was ~1% below it on Oct 28. Under the surface: Technology -7.7% (week of Oct 12–16) as the 'most crowded winner' unwound, with staples, energy, health care and materials leading; Communication Services -4.4% (Oct 19–23). On Oct 29 Microsoft beat (Azure ~+48%) while Alphabet fell ~12% on reported revenue/profit misses and negative free cash flow; Google and Microsoft reportedly did not raise capex guidance. Amazon reported after the Oct 29 close (shares -1.4% on Oct 30). On Oct 30 our quotes show NVDA -4.1%, AVGO -5.5%, AMAT -7.5%, ANET -8.3%, AMD -10.8%.

> **Read-across to the book.** Two scenarios matter. (1) *Oil stays high and inflation sticks:* the Fed hikes, long-duration assets (tech, REITs, utilities) compress, and your energy and financials positions help. (2) *Hormuz normalizes:* oil and yields retreat, defensives and energy lose leadership, and the tech de-rating becomes a buying opportunity. The recommended stance (hold energy and financials, build tech, industrials and health care gradually) is deliberately balanced across both.

3. Where the opportunity set is richest

Average composite score of each sector's five highest-ranked names; bars show how deep the quality-plus-value opportunity is, independent of your exposure.

Sector	Best score	Avg top-5	Avg top-5 upside	Opportunity-set quality	Top 3 names
Information Technology	87.5	78.5	+60%		NVDA, MU, MSFT
Industrials	74.8	67.5	+37%		GEV, UBER, CAT
Consumer Discretionary	76.8	65.1	+31%		AMZN, BKNG, RCL
Communication Services	72.4	64.7	+43%		GOOGL, META, TMUS
Utilities	64.6	61.6	+38%		NRG, VST, CEG
Health Care	62.9	61.6	+11%		LLY, UNH, TMO
Real Estate	65.0	61.0	+22%		EQIX, DLR, WELL
Materials	64.9	60.4	+18%		NEM, MLM, FCX
Financials	61.0	59.1	+20%		BLK, MA, BAC
Consumer Staples	57.7	53.2	+6%		KO, MDLZ, WMT
Energy	58.5	51.9	+12%		BKR, WMB, SLB

Cross-sector top 12 by composite score (indicative)

#	Company	Sector	Score	Upside	P/E	Held
1	**NVDA** NVIDIA	Info Tech	**87.5**	+63%	27.0x	0.7%
2	**MU** Micron Technology	Info Tech	**78.6**	+84%	12.6x	–
3	**MSFT** Microsoft	Info Tech	**78.0**	+21%	27.7x	3.0%
4	**AMZN** Amazon	Cons Discretionary	**76.8**	+37%	19.7x	7.3%
5	**AVGO** Broadcom	Info Tech	**75.0**	+63%	44.0x	2.2%
6	**GEV** GE Vernova	Industrials	**74.8**	+36%	23.3x	1.5%
7	**BKNG** Booking Holdings	Cons Discretionary	**74.4**	+57%	16.6x	–
8	**AMAT** Applied Materials	Info Tech	**73.5**	+67%	36.4x	–
9	**UBER** Uber	Industrials	**72.8**	+56%	14.4x	0.3%
10	**LRCX** Lam Research	Info Tech	**72.4**	+53%	37.9x	–
11	**GOOGL** Alphabet	Comm Services	**72.4**	+43%	14.8x	2.4%
12	**ORCL** Oracle	Info Tech	**72.3**	+84%	21.9x	–

Scores are relative within each sector (valuation is measured against the sector median P/E), so cross-sector comparisons overstate precision. Use the sector rankings below as the primary output.

4. Methodology and data caveats

Component	Weight	Definition
Consensus upside	25%	Mean analyst price target vs Oct 30 close, scaled -10% to +50%. Targets last updated before Sep 15 are half-weighted toward neutral.
Analyst sentiment	15%	Share of Buy ratings (30%→0, 95%→100), shrunk toward neutral when fewer than 20 analysts cover the name.
Valuation	20%	Trailing P/E vs the sector pool median (half the median = 100; double = 0). P/Es that are negative, >100x or <5x, and all REITs, are scored neutral. Commodity and memory names get a cycle-peak haircut.
Price trend	10%	Position within the 52-week range.
Quality & growth	30%	*My judgment*, 1–10: moat, growth durability, balance sheet, capital allocation. This is the only subjective input and is the most debatable.

- **Pool, not census.** Each sector was ranked from 10–14 of its largest, most liquid S&P 500 names (138 in total). Names outside the pool were not scored; Materials ranks 10 names because CTVA (Vylor spin-off on Oct 1, price history not comparable) and NUE (stale 2021 target) were excluded.
- **Portfolio file.** Analysis uses retirement-portfolio-63.xlsx (Oct 16), the latest available in the project. Your canonical v66 was not available here; positions changed since Oct 16 are not reflected.
- **Targets lag price.** Many analyst targets pre-date the Oct 12–30 tech selloff and the Oct 29–30 earnings reactions, so upside to tech and semiconductor targets is likely overstated.
- **Model bias.** The score favours beaten-down quality (high upside, low range position) over momentum leaders; staples and health care score lower because they are near highs.
- **Data quality.** Trailing P/E from Robinhood can be distorted by one-offs (e.g., Merck 149x, DuPont 334x, Gilead negative). Prices are Oct 30 closes; a few market-moving explanations (e.g., the Oct 30 semis selloff, Boston Scientific's drawdown) were not verified.
- **Not advice.** This is research for a portfolio manager, not an order list; sizing and timing remain your call.

Information Technology

UNDERWEIGHT, ADD SELECTIVELY

23.6%	40.5%	-16.9pp	17.3% / 4.1%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

The earnings engine of the index, but the AI trade is being re-priced name by name, not abandoned.

Thesis. AI infrastructure is still the largest pool of incremental profit in the S&P 500, and it is migrating through the stack: compute (NVDA, AMD, AVGO), memory (MU), wafer-fab equipment (AMAT, LRCX, KLAC), and networking (ANET). Microsoft's press-reported ~48% Azure growth on Oct 28 showed AI demand converting to revenue; Alphabet's Oct 29 miss and negative free cash flow showed the other side, with investors now demanding proof of payback. The sector was still up ~27% YTD at Oct 23 (Tapeboard), so the current drawdown is a de-crowding of the market's biggest winner.

What the tape says. Technology fell 7.7% in the week of Oct 12–16 (Tapeboard), and in our quotes semis fell again on Oct 30: AMD -10.8%, ANET -8.3%, AMAT -7.5%, AVGO -5.5%, NVDA -4.1%. Analyst mean targets were mostly set before these moves, so the 63–84% 'upside' on MU, ORCL, AMAT and NVDA is an upper bound that has not been refreshed. We did not verify a catalyst for the Oct 30 move.

Valuation. The 14-name pool's median trailing P/E is ~37x, but the highest-quality compounders are the cheapest: NVDA 27x and MSFT 28x. AAPL ranks last of 14 (price 3% above its mean target, 94% of its 52-week range) — a quality business at a full price.

Risks. Capex digestion if hyperscalers defer spend (Google and Microsoft reportedly did not raise capex guidance), a ~5% 10-year yield compressing long-duration multiples, export controls, and supply-chain circularity (suppliers financing customers).

> **Portfolio fit.** You are 17pp underweight the S&P (which is ~40% tech), but the AI-infrastructure cluster (NVDA, AVGO, TSM, ASML, GRID, GEV, VIS) is already **6.8% of NAV**, so size additions in aggregate. Prefer MSFT (3.0%) and NVDA (0.7%): they combine the highest scores with the lowest trailing multiples. AAPL (6.8%) is a hold, not an add.

Monitor: Hyperscaler capex revisions and Amazon's Oct 29 print · NVDA's November earnings · Export-control headlines · 10-year yield vs 5%

Top 10 ranking: Information Technology (pool of 14 liquid S&P 500 names; median P/E 37.1x)

#	Company	Score	Price	Mean tgt (low–high)	Upside	Buy%	P/E	52-wk pos.	Oct 30
1	**NVDA** NVIDIA HELD 0.7%	87.5	$204.81	$334.45 $180.00–$710.29	+63%	95% 73 analysts	27.0x	51%	-4.1%
	Why: Category-defining AI compute and networking platform; CUDA software moat and an annual product cadence sustain share and pricing power. **Risk:** Hyperscaler-capex dependence, export controls, and the Oct 30 semis de-rating.								
2	**MU** Micron Technology	78.6	$884.69	$1,632 $1,150–$3,000	+84%	95% 56 analysts	12.6x	65%	-5.3%
	Why: One of three scaled DRAM/HBM suppliers benefiting from AI-driven memory tightness; mix and pricing are improving. **Risk:** Memory is tech's most cyclical niche; earnings look peak-like, so the low P/E is haircut in scoring.								
3	**MSFT** Microsoft HELD 3.0%	78.0	$521.90	$632.59 $440.00–$870.00	+21%	92% 63 analysts	27.7x	86%	-1.6%
	Why: Press-reported ~48% Azure growth in the Oct 28 print shows AI demand converting to revenue; enterprise distribution and Copilot attach deepen a wide moat. **Risk:** Capex intensity; reports that capex guidance was not raised; thinnest target upside among the leaders.								

#	Company	Score	Price	Mean tgt (low–high)	Upside	Buy%	P/E	52-wk pos.	Oct 30
4	**AVGO** Broadcom HELD 2.2%	75.0	$326.18	$532.31 $400.00–$660.00	+63%	96% 55 analysts	44.0x	18%	-5.5%
	Why: Custom AI accelerator (XPU) and Ethernet networking leader, plus a high-margin VMware software annuity; 53 of 55 analysts rate Buy. **Risk:** A handful of hyperscaler ASIC customers; overlaps your NVDA/TSM/ASML/GEV AI cluster.								
5	**AMAT** Applied Materials	73.5	$390.16	$651.64 $515.00–$900.00	+67%	88% 40 analysts	36.4x	35%	-7.5%
	Why: Broadest toolset in wafer-fab equipment, levered to leading-edge logic, HBM/DRAM and advanced packaging. **Risk:** WFE cyclicality and China export rules; shares ~47% below the 52-week high.								
6	**LRCX** Lam Research	72.4	$239.28	$366.70 $255.00–$500.00	+53%	86% 35 analysts	37.9x	34%	-5.9%
	Why: Etch and deposition leader with strong NAND/HBM and gate-all-around exposure; installed-base services cushion the cycle. **Risk:** Memory-capex swings and China export exposure.								
7	**ORCL** Oracle	72.3	$130.70	$240.58 $110.00–$400.00	+84%	80% 44 analysts	21.9x	11%	-6.3%
	Why: Large contracted cloud-infrastructure backlog plus a database franchise, at the low end of the group's multiple and near the bottom of its range. **Risk:** Heavy, partly debt-funded capex; AI-lab customer concentration; free-cash-flow pressure.								
8	**ANET** Arista Networks	71.2	$168.86	$248.54 $205.00–$290.00	+47%	100% 35 analysts	58.1x	53%	-8.3%
	Why: Share leader in high-speed data-center Ethernet with AI back-end networking as a second growth leg; all 35 covering analysts rate Buy. **Risk:** Premium multiple, cloud-titan concentration, and a ~8% drop on Oct 30.								
9	**KLAC** KLA Corp	65.7	$157.95	$225.00 $175.00–$325.00	+42%	71% 31 analysts	41.8x	25%	-5.7%
	Why: Near-monopoly share in process control and yield management; intensity rises with every node shrink and packaging step. **Risk:** WFE cycle and China exposure; still a high multiple after a ~49% drawdown.								
10	**AMD** Advanced Micro Devices	65.0	$505.18	$658.63 $465.00–$1,250	+30%	82% 57 analysts	n/m	67%	-10.8%
	Why: Instinct GPU roadmap and EPYC server-share gains make it the clearest second source to NVDA; 47 of 57 analysts rate Buy. **Risk:** GAAP P/E (145x) is amortization-distorted; execution gap vs NVDA; fell ~11% on Oct 30.								

† Mean target last updated before Sep 15, 2026 (stale; half-weighted). *REIT trailing P/E not meaningful; valuation scored neutral. n/m = negative, >100x or <5x trailing P/E treated as distorted by one-offs.

Also scored, outside the top 10: NOW 64.8 (#11) · **CSCO** 57.4 (#12) · **PLTR** 55.0 (#13) · **AAPL** 49.0 (#14) HELD 6.8%.

Held but not scored in this pool: CRM (1.3%), QCOM (1.0%), ADBE (0.5%), TSM (1.0%), ASML (0.7%). TSM and ASML are non-S&P ADRs;

Financials

OVERWEIGHT, HOLD, NO NEW CAPITAL

28.1%	10.0%	+18.2pp	23.2% / 2.3%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

Your biggest active bet: ~2.8x the index weight, resting on payments and money-center banks.

Thesis. Financials benefit from a steeper curve (2-year ~4.7%, 10-year ~5.0% on Oct 28), a recovering capital-markets cycle, and toll-road payment networks (Visa, Mastercard) with 40%+ incremental margins. BlackRock tops our ranking on asset-gathering plus private-markets growth.

Dispersion. The ranking is tight (BLK 61.0 to BRK.B 53.8 across the top nine): Bank of America (12x, +25% upside) and Charles Schwab (15x, price at 13% of its range, +32% upside) are the cheapest quality names; Mastercard and Visa are near highs with 8–11% upside; Goldman ranks #10 with only 41% Buy ratings; Amex ranks 13th.

Risks. Credit costs at a ~5% 10-year yield and 3.7% CPI, a December hike tightening financial conditions, trading-revenue normalization, and interchange regulation. The concentration itself is the main risk: one macro factor drives the whole book.

> **Portfolio fit.** Financials are **28.1% of the US sleeve vs 10.0%** for the S&P (+18pp). Direct positions: JPM 7.0%, MA 6.4%, GS 5.5%, V 2.4%, AXP 1.9%. All sit under the 8% hard cap, so no trim is triggered, and the 'hold compounders, don't trim for macro' rule applies. Direct all new capital elsewhere so the weight dilutes naturally. GS is the first name to review if a trim is ever needed.

Monitor: Dec 9 FOMC (market pricing a hike) · Q4 credit-card delinquencies · Yield-curve shape · Capital-markets fees

Top 10 ranking: Financials (pool of 14 liquid S&P 500 names; median P/E 15.2x)

#	Company	Score	Price	Mean tgt (low–high)	Upside	Buy%	P/E	52-wk pos.	Oct 30
1	**BLK** BlackRock	61.0	$1,147	$1,376 $1,250–$1,531	+20%	95% 21 analysts	27.5x	85%	-2.5%
	Why: World's largest asset manager: iShares flows plus private-markets (credit, infrastructure) growth; 20 of 21 rate Buy. **Risk:** 27.5x trailing on a market-sensitive fee base.								
2	**MA** Mastercard HELD 6.4%	59.6	$638.01	$705.97 $620.00–$775.00	+11%	89% 44 analysts	33.2x	97%	+0.4%
	Why: Payments toll-road with high incremental margins and cross-border growth. **Risk:** Near 52-week high; interchange regulation and litigation.								
3	**BAC** Bank of America	59.0	$50.00	$62.63 $55.00–$71.00	+25%	82% 28 analysts	12.2x	20%	-2.2%
	Why: Deposit franchise with improving returns; ~12x earnings and 23 of 28 rate Buy. **Risk:** Credit costs and deposit mix at ~5% long yields.								
4	**JPM** JPMorgan Chase HELD 7.0%	58.4	$337.10	$374.84 $312.00–$425.00	+11%	58% 31 analysts	14.4x	66%	-1.9%
	Why: Best-in-class universal bank with fortress capital at ~14x earnings. **Risk:** Net-interest-income peak; only 58% Buy; already 7% of your NAV.								
5	**SCHW** Charles Schwab	57.6	$88.02	$116.00 $82.00–$147.00	+32%	72% 25 analysts	15.3x	13%	-1.6%
	Why: Asset-gathering plus net-interest recovery; 15x earnings with price near the bottom of its range. **Risk:** Client cash sorting and rate path.								

#	Company	Score	Price	Mean tgt (low–high)	Upside	Buy%	P/E	52-wk pos.	Oct 30
6	**SPGI** S&P Global	57.1	$466.43	$521.62 $470.00–$553.00	+12%	93% 28 analysts	27.4x	64%	+1.3%
	Why: Ratings, indices and data franchise with recurring subscription growth; 26 of 28 rate Buy. **Risk:** 27x earnings; issuance-cycle sensitivity.								
7	**V** Visa HELD 2.4%	56.6	$413.62	$448.71 $375.00–$485.00	+8%	88% 43 analysts	36.8x	97%	+0.8%
	Why: Global payments network with cross-border and new-flows growth. **Risk:** Near 52-week high; regulatory and merchant litigation.								
8	**WFC** Wells Fargo	55.7	$83.42	$97.33 $88.00–$108.00	+17%	72% 29 analysts	12.0x	43%	-1.6%
	Why: Efficiency gains and capital return post asset-cap at ~12x earnings. **Risk:** Slow loan growth and credit.								
9	**BRK.B** Berkshire Hathaway B	53.8	$543.41	$549.08 $490.25–$628.00	+1%	29% 7 analysts	13.6x	92%	+0.3%
	Why: Float-funded compounding with a large cash pile and diversified operating businesses. **Risk:** Price ≈ mean target; only 7 analysts; succession.

Communication Services

NEUTRAL

9.7%	9.9%	-0.2pp	7.8% / 1.0%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

Two different sectors under one label: AI-funded ad platforms and a shrinking-moat media and telecom group.

Thesis. Alphabet and Meta are the sector's compounders (search, YouTube, Instagram/WhatsApp ads) and are funding the AI buildout from advertising cash flow; Netflix, Disney and Take-Two are content-driven; the telecoms (T, VZ, TMUS, CMCSA, CHTR) are low-growth cash-flow annuities under rate and competition pressure. The sector is the market's laggard: -4.4% in the week of Oct 19–23 and -9.7% YTD (Tapeboard).

What changed. Alphabet fell ~12% on Oct 29 after reported revenue and profit misses, a slowdown in search-ad growth and negative FCF; it now trades at ~15x trailing earnings and 7% of its 52-week range, ranking #1 on our model because consensus targets still sit 43% above the price. Netflix cut its 2026 ad-revenue target to ~$2.7B on Oct 21 and guided Q4 revenue below consensus; Needham downgraded it on content gaps and YouTube share loss. Both are held.

Valuation. The group's median P/E is ~15x — among the lowest of any sector — but cheap here has repeatedly meant 'earnings at risk'. Take-Two and Live Nation show negative GAAP P/Es and are scored neutral on valuation.

Risks. AI payback skepticism (negative FCF at Alphabet and Meta), regulatory remedies on search and ads, linear-TV decline, and rate sensitivity for leveraged telecoms.

> **Portfolio fit.** Your 9.7% share of the US sleeve is in line with the S&P (9.9%). Holdings: GOOG 2.4%, META 2.3%, NFLX 1.8%, DIS 1.3%. Do not add to Alphabet until the market digests whether Oct 29 was an AI-capex reset or a search-share problem; Netflix needs a position review (guidance cut plus analyst downgrade) rather than an add.

Monitor: Alphabet's next capex guide and search-ad growth · Meta capex vs revenue growth · Netflix Q4 delivery on guidance · Disney's November report

Top 10 ranking: Communication Services (pool of 12 liquid S&P 500 names; median P/E 14.8x)

#	Company	Score	Price	Mean tgt (low–high)	Upside	Buy%	P/E	52-wk pos.	Oct 30
1	**GOOGL** Alphabet HELD 2.4%	72.4	$279.91	$400.28 $300.00–$500.00	+43%	90% 72 analysts	14.8x	7%	-1.4%
	Why: Search, YouTube, Cloud and TPU/Gemini under one balance sheet at ~15x trailing earnings; the Oct 29 reset leaves shares at the bottom of their range. **Risk:** Press-reported revenue/profit miss, slowing search-ad growth and negative FCF on Oct 29; AI-capex payback unproven. You hold the C-share (GOOG).								
2	**META** Meta Platforms HELD 2.3%	66.0	$614.98	$850.51 $650.00–$1,050	+38%	90% 72 analysts	21.3x	36%	-1.5%
	Why: Unmatched social-ad reach with AI ad-ranking gains; ~21x earnings for double-digit revenue growth. **Risk:** 2026 capex guided to $135–145B (press) with negative FCF in the latest quarter; Reality Labs losses.								
3	**TMUS** T-Mobile US	65.2	$156.44	$226.08 $165.00–$296.00	+45%	87% 31 analysts	14.2x	16%	+6.2%
	Why: Subscriber and ARPU growth leader among US wireless carriers; ~14x earnings, 27 of 31 analysts rate Buy. **Risk:** Intense wireless/cable convergence competition; leverage.

Health Care

UNDERWEIGHT, BUILD SELECTIVELY

4.6%	9.2%	-4.6pp	2.5% / 1.6%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

Defensive growth that has re-rated; the opportunity is in quality at fair prices, not bargains.

Thesis. Health care is a mix of secular growers (Lilly's incretins, Intuitive, Boston Scientific, Stryker), tools (Thermo, Danaher) and policy-exposed franchises (UnitedHealth, large pharma). It gained 3.5% in the week of Oct 12–16 and 1.45% in the week of Oct 19–23 (Tapeboard), and several leaders now trade near 52-week highs.

Dispersion. Our scores cluster tightly (52–63) with no standout: Lilly (62.9) is the best business but sits near its high with ~3% upside; UnitedHealth (62.8) offers 17% consensus upside at 23.5x trailing; Boston Scientific shows 24% upside but is ~60% below its 52-week high for reasons we did not investigate, so it needs diligence before it is actionable. Merck's 149x and Gilead's negative GAAP P/E are acquisition-charge artifacts and are scored neutral.

Policy. Drug-pricing agreements and tariff relief negotiated between the administration and large drugmakers, plus Medicare Advantage rate policy, remain the key swing factors.

Risks. Pricing policy, medical-cost trend for managed care, patent cliffs (Keytruda), and tariff costs for devices.

> **Portfolio fit.** You are 4.6% of the US sleeve vs 9.2% for the S&P (-4.6pp), with UNH 1.2%, BMY 1.1% and GEHC 0.2% held (BMY and GEHC are outside this scored pool; see the standalone GEHC report). This is the sector where an underweight is easiest to close with quality: stage LLY and UNH, and diligence BSX.

Monitor: Drug-pricing and tariff announcements · Medicare Advantage rate notice · Lilly orforglipron regulatory path · Boston Scientific drawdown cause

Top 10 ranking: Health Care (pool of 14 liquid S&P 500 names; median P/E 38.0x)

Consumer Discretionary

NEUTRAL, HOLD AMZN

9.9%	8.9%	+1.1pp	7.3% / 1.7%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

A K-shaped consumer: experiences and off-price win; housing-linked and low-end names lag.

Thesis. The sector is dominated by Amazon (which alone is roughly 40% of the sector's index weight) and Tesla, so the 'sector' read is really an Amazon read. Underneath, the winners are experience compounders (BKNG, RCL), off-price retail (TJX) and auto-parts (ORLY); the laggards are rate-sensitive housing retail (HD, LOW) and brand-challenged consumer names (NKE, SBUX, MAR rank last).

Macro. September CPI ran 3.7% year on year with energy up 20% (press); the Fed held at 3.75–4.00% with two dissents for a hike and futures price ~85% odds of a December increase. A ~5% 10-year yield keeps mortgage rates high, which is why Home Depot shows only ~15% target upside.

Opportunity. Booking (#2) trades at ~16.6x trailing earnings and 3% of its 52-week range, which is the best valuation-plus-quality setup in the sector outside Amazon. Chipotle is near its 52-week low with consensus upside of 28%, but traffic is the debate.

Risks. Gasoline-driven consumer squeeze, tariffs on imported goods, and AI-capex scrutiny on Amazon.

> **Portfolio fit.** Sector weight is 9.9% of the US sleeve vs 8.9% for the S&P, driven by AMZN at **7.3% of NAV**, near the top of your 6–8% soft cap. Hold; Amazon's Q3 reaction (-1.4% on Oct 30) does not argue for a trim. New money, if any, should go to BKNG rather than adding to the single-name concentration.

Monitor: Amazon AWS growth and Q4 guide · Consumer spending vs 3.7% CPI · 10-year yield and mortgage rates · Travel demand into winter

Top 10 ranking: Consumer Discretionary (pool of 13 liquid S&P 500 names; median P/E 22.0x)

#	Company	Score	Price	Mean tgt (low–high)	Upside	Buy%	P/E	52-wk pos.	Oct 30
1	**AMZN** Amazon HELD 7.3%	76.8	$240.47	$329.75 $230.00–$405.00	+37%	97% 70 analysts	19.7x	49%	-1.4%
	Why: AWS re-acceleration plus retail margin expansion (ads, robotics); 68 of 70 analysts rate Buy at ~20x earnings. **Risk:** Q3 reported after the Oct 29 close (shares -1.4% on Oct 30); capex intensity; already 7.3% of your NAV.								
2	**BKNG** Booking Holdings	74.4	$148.18	$233.18 $170.00–$301.00	+57%	80% 40 analysts	16.6x	3%	-1.5%
	Why: Largest global online-travel platform: high returns on capital and heavy buybacks; ~16.6x earnings, ~32% below the 52-week high. **Risk:** Travel-demand cyclicality, Google-search dependence, EU regulatory risk.								
3	**RCL** Royal Caribbean	62.1	$307.17	$354.96 $298.00–$425.00	+16%	78% 32 analysts	18.4x	63%	-1.1%

8	**HD** Home Depot	49.3	$329.25	$377.20 $310.00–$425.00	+15%	56% 39 analysts	23.0x	43%	+0.1%
	Why: Scale leader in home improvement with Pro/SRS adjacencies and steady capital returns. **Risk:** Rate-sensitive housing activity; modest upside to targets.								
9	**MCD** McDonald's	47.8	$258.18	$288.29 $230.00–$356.00	+12%	57% 37 analysts	20.9x	26%	+0.3%
	Why: Franchise-royalty model with value-menu repositioning and global scale. **Risk:** Low-income consumer weakness; limited upside to consensus.								
10	**TSLA** Tesla	40.9	$399.83	$418.86 $66.00–$600.00	+5%	50% 52 analysts	n/m	51%	-0.9%
	Why: Autonomy/robotaxi and energy-storage optionality on top of a large vehicle base. **Risk:** 443x trailing P/E, price near the mean target, and only 50% Buy ratings.								

† Mean target last updated before Sep 15, 2026 (stale; half-weighted). *REIT trailing P/E not meaningful; valuation scored neutral. n/m = negative, >100x or <5x trailing P/E treated as distorted by one-offs.

Also scored, outside the top 10: **MAR** 34.5 (#11) · **SBUX** 27.2 (#12) · **NKE** 24.0 (#13).

Industrials

UNDERWEIGHT, ADD COMPOUNDERS

4.9%	8.2%	-3.4pp	1.8% / 2.6%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

Electrification, aerospace aftermarket and reshoring: the best breadth of quality compounders after tech.

Thesis. Three profit pools: (1) AI-driven power and electrification (GE Vernova, Eaton, Quanta, Trane, Parker), (2) aerospace aftermarket annuities (GE Aerospace, TransDigm), (3) cyclical recovery (Caterpillar, Deere, rails). Industrials fell 1.9% in the week of Oct 19–23 (Tapeboard) and several leaders sit well below 52-week highs (CAT -42%, GEV -28%, ETN -23%).

Opportunity. GE Vernova (#1) combines a multi-year turbine and grid backlog with a ~23x trailing multiple; Uber (#2, stale target) is ~14x and near its 52-week low. Caterpillar, Parker, GE Aerospace and Eaton score 62–64 and each offers 24–41% consensus upside after the pullback. TransDigm (#12) and RTX (#13) are quality but lower on valuation and momentum.

Risks. Overlap: GEV, ETN, PWR and TT share the AI-power capex driver with your semiconductors. Also cyclical demand if rates stay ~5%, and execution on backlog.

> **Portfolio fit.** You are 4.9% of the US sleeve vs 8.2% for the S&P (-3.4pp), with GEV 1.5% and UBER 0.3% direct, plus VIS, GRID and the mid/small funds. Add breadth that is *not* AI-power (CAT, PH, GE Aerospace) to close the gap without raising cluster concentration.

Monitor: GEV backlog and margins · Caterpillar dealer inventory · Aerospace production rates · Industrial PMI

Top 10 ranking: Industrials (pool of 14 liquid S&P 500 names; median P/E 31.4x)

	Why: Class-I rail with pricing power and efficiency gains. **Risk:** Volume cyclicality; near its 52-week high.								
9	**PWR** Quanta Services	**58.4**	$620.99	$795.08 $483.18–$967.00	+28%	82% 34 analysts	57.5x	56%	-2.2%
	Why: Grid and data-center construction super-cycle; 28 of 34 rate Buy. **Risk:** 57x trailing P/E; labor and execution risk.								
10	**HON** Honeywell	**56.2**	$218.30	$258.10 $225.00–$303.00	+18%	56% 27 analysts	9.5x	35%	-1.7%
	Why: Portfolio simplification continues after the aerospace separation (Honeywell Aerospace now lists separately). **Risk:** 9.5x P/E is likely distorted by separation accounting; treat valuation score cautiously.								

† Mean target last updated before Sep 15, 2026 (stale; half-weighted). *REIT trailing P/E not meaningful; valuation scored neutral. n/m = negative, >100x or <5x trailing P/E treated as distorted by one-offs.

Also scored, outside the top 10: WM 54.5 (#11) · **TDG** 54.0 (#12) · **RTX** 53.5 (#13) · **DE** 46.5 (#14).

Consumer Staples

OVERWEIGHT, HOLD, NO NEW MONEY

6.7%	4.5%	+2.2pp	5.2% / 0.9%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

The defensive bid has made staples the most fully valued opportunity set in the index.

Thesis. Staples gained 5.0% in the week of Oct 12–16 (Tapeboard) as money rotated out of tech into defensives. The result is a sector where KO, KDP, MO and PM sit above 90% of their 52-week ranges and consensus upside runs from -6% to +8%. Our model's best score in the sector is 57.7 (Coca-Cola), the lowest top score of any sector.

Quality is real; price is the issue. Costco (our 9/10 quality score) trades at 48x and Walmart at 44x; Coca-Cola and Philip Morris sit at their 52-week highs. Target, PepsiCo and Colgate offer lower multiples but weaker fundamental momentum. Altria trades above its mean target with only 24% Buy ratings.

Fit with your mandate. With an $80K guaranteed pension covering income, the defensive-yield function of staples has little value to this portfolio; their role is ballast, not growth.

Risks. Volume weakness from consumer pricing fatigue, cocoa and commodity swings, and a reversal of the defensive rotation.

> **Portfolio fit.** You are 6.7% of the US sleeve vs 4.5% for the S&P. Holdings: KO 1.6%, PM 2.2%, PEP 1.3%. KO and PM rank #1 and #6 but with little upside; PEP is outside the top 10 (rank 12). Hold all three, add none, and let new capital dilute the sector.

Monitor: Q4 volume trends · Cocoa and commodity costs · Defensive rotation unwind

Energy

OVERWEIGHT, HOLD, NO ADDS

5.7%	3.5%	+2.2pp	4.1% / 1.0%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

The inflation hedge is working, and consensus has not caught up: three majors trade above their mean targets.

Thesis. Energy is the year's best sector (+52% YTD at Oct 23, Tapeboard) as Strait of Hormuz disruption has pushed Brent above $100 (≈$117 on Oct 23, then -6% on Oct 26) and drove September energy CPI up 20% (press). Several producers and refiners now sit at 52-week highs (CVX, COP, EOG, XOM).

What is priced. XOM (-4%), CVX (-1%) and COP (-1%) trade at or above analyst mean targets, and refiners at 8–9x P/E are capitalizing peak crack spreads. We apply a cycle-peak haircut to commodity names, which is why the sector's top score is only 58.5.

Where the model leans. Services and midstream (Baker Hughes, Williams, SLB) rank above producers: lower commodity beta, still levered to gas and LNG demand.

Risks. A Hormuz resolution could reverse oil sharply; conversely, persistent oil keeps inflation high, which raises Fed-hike odds and pressures long-duration equities elsewhere in your book. Energy is a hedge for that second scenario.

> **Portfolio fit.** Energy is 5.7% of the US sleeve vs 3.5%, with XOM at 4.1% of NAV (plus fund exposure via AVUV and SCHD). XOM ranks last of 12 on our model, but as a hedge against the macro regime that hurts the rest of the portfolio, a hold is reasonable. No adds; watch for a Hormuz normalization.

Utilities

NEUTRAL, OWN GENERATORS

2.8%	1.9%	+0.9pp	2.1% / 0.5%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

Data-center load growth favours generators; regulated utilities are fighting a ~5% 10-year yield.

Thesis. Electricity demand from data centers is the first sustained load growth in roughly two decades (industry view), and PJM's 2025 capacity auction cleared at its price cap, and given independent producers (NRG, Vistra, Constellation) long-term contracting leverage. Regulated utilities (NEE, XEL, AEP, DUK, SO) get rate-base growth but compete with a 5% risk-free yield.

Ranking. NRG (+82% to mean target) and Vistra (+50%, stale target) lead because both trade near 52-week lows after a de-rating (cause not investigated); Constellation is the quality choice with the largest US nuclear fleet. Xcel and NextEra are the regulated names ranked highest. Southern (#11) and Dominion (#12) rank last on weak analyst sentiment (35% and 29% Buy).

Risks. The IPPs trade with the AI-power cluster (GEV, CEG, VST, NRG), so they add correlated risk to GEV and the semiconductor holdings; regulated names risk higher funding costs and political pushback on bills.

> **Portfolio fit.** You are 2.8% of the US sleeve vs 1.9% for the S&P, entirely in SO (2.1% of NAV), a regulated, bond-proxy name that ranks outside the top 10. No change is urgent; if adding utilities, CEG is the quality route but counts toward the AI-power cluster.

Monitor: PJM auction outcomes · Hyperscaler PPAs · Utility rate cases · 10-year yield

Top 10 ranking: Utilities (pool of 12 liquid S&P 500 names; median P/E 22.5x)

Materials

SMALL UNDERWEIGHT

0.6%	1.6%	-1.0pp	0.0% / 0.6%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

A small sector with commodity-beta winners (gold, copper) and slow compounders (industrial gases, aggregates).

Thesis. Materials is 1.6% of the S&P and 0.6% of your US sleeve (via funds only). Profit pools: precious metals (Newmont, with gold near $4,000), copper (Freeport) for electrification, construction aggregates (Martin Marietta, Vulcan), industrial gases (Linde, Air Products) and coatings. Materials gained 3.0% in the week of Oct 12–16 (Tapeboard).

Ranking. Newmont (#1) and Freeport (#3) lead on consensus upside, but we apply a commodity-cycle haircut to their cheap P/Es. Martin Marietta (#2) is the quieter value pick at ~13x trailing earnings. Linde (#4) is the highest-quality compounder (9/10) but trades at 33x near its high.

Coverage note. Corteva (CTVA) is excluded: it separated its seed business into Vylor (VYLR) on Oct 1, and its share price and 52-week range are not comparable. Nucor is excluded because its analyst target dates from 2021. This sector therefore ranks 10 names, not a full top-10 cut of a larger pool.

Risks. Gold reversal (gold fell ~4% in the week to Oct 23), copper supply incidents, and weak construction volumes at ~5% rates.

> **Portfolio fit.** Materials are 0.6% of the US sleeve vs 1.6% for the S&P (-1.0pp), with no direct positions. The gap is small and not a priority. If you want exposure, LIN is the compounder fit and MLM adds a construction/infrastructure angle without extra AI-cluster overlap.

Monitor: Gold and copper prices · US construction volumes · Linde and Air Products project backlogs

† Mean target last updated before Sep 15, 2026 (stale; half-weighted). *REIT trailing P/E not meaningful; valuation scored neutral. n/m = negative, >100x or <5x trailing P/E treated as distorted by one-offs.

Real Estate

NEUTRAL, DIGITAL INFRA ONLY

3.4%	1.9%	+1.4pp	2.5% / 0.5%
YOUR US-EQUITY SLEEVE	S&P 500 WEIGHT	ACTIVE WEIGHT	DIRECT / VIA FUNDS (% NAV)

The 10-year yield is the sector. Data centers and towers have cash-flow growth that offsets it; the rest do not.

Thesis. REIT valuations compress when the 10-year yield approaches 5%, which is the current backdrop. Within the sector, secular demand drivers separate the winners: data centers (Equinix, Digital Realty), towers (American Tower), senior housing (Welltower), and logistics (Prologis). Traditional retail, storage and net-lease REITs have weaker growth and lower analyst sentiment (Public Storage 30% Buy, Simon 32%, Realty Income 30%).

Method note. Trailing GAAP P/E is not meaningful for REITs (depreciation, gains), so the valuation component is held neutral for all REITs and the ranking relies on quality, consensus upside, sentiment and price trend. CBRE (a services firm, not a REIT) is scored on P/E.

Risks. A December Fed hike or a 10-year above 5.2% would pressure the whole group; data-center REITs also carry AI-demand risk.

> **Portfolio fit.** You are 3.4% of the US sleeve vs 1.9% for the S&P, entirely AMT (2.5% of NAV, rank 5, 24 of 26 Buy). Hold; no change.

Monitor: 10-year yield · Tower carrier churn · Data-center leasing

1	**EQIX** Equinix	65.0	$1,014	$1,237 $1,110–$1,380	+22%	86% 37 analysts	62x*	72%	-2.2%
	Why: Global interconnection leader benefiting from AI and hyperscale leasing; 32 of 37 rate Buy. **Risk:** Trailing P/E not meaningful for REITs (AFFO matters); capex intensity.								
2	**DLR** Digital Realty	61.6	$180.83	$224.67 $197.00–$250.00	+24%	84% 37 analysts	77x*	56%	-1.1%
	Why: Hyperscale/colocation data-center landlord with a strong leasing cycle. **Risk:** Capital-intensive; rate sensitivity.								
3	**WELL** Welltower	60.1	$234.67	$262.14 $233.00–$292.00	+12%	83% 24 analysts	n/m*	74%	+0.6%
	Why: Senior-housing REIT with demographic tailwind and strong NOI growth. **Risk:** GAAP P/E negative (not meaningful); equity issuance.								
4	**CBRE** CBRE Group	59.6	$128.79	$175.73 $155.00–$200.00	+36%	87% 15 analysts	27.5x	14%	+0.2%
	Why: Largest commercial real-estate services firm: transaction recovery plus outsourcing annuity; ~26% below Feb high. **Risk:** Transaction volumes are rate-sensitive.								
5	**AMT** American Tower HELD 2.5%	58.5	$187.85	$216.09 $188.00–$260.00	+15%	92% 26 analysts	26x*	65%	+1.1%
	Why: Tower REIT with contracted escalators; 24 of 26 rate Buy. **Risk:** ~5% 10-year yield; carrier churn.								
6	**PLD** Prologis	58.3	$128.02	$151.92 $136.00–$170.00	+19%	78% 18 analysts	28x*	21%	+0.0%
	Why: Logistics REIT leader with a development pipeline. **Risk:** Rate-sensitive; growth moderation.								

#	Company	Score	Price	Mean tgt (low–high)	Upside	Buy%	P/E	52-wk pos.	Oct 30
7	**VICI** VICI Properties	48.0	$24.48	$30.32 † $24.00–$37.00	+24%	62% 26 analysts	11x*	24%	-0.2%
	Why: Gaming triple-net REIT with CPI-linked rent escalators. **Risk:** Target stale; tenant concentration.								
8	**CCI** Crown Castle	40.2	$88.70	$92.75 $80.00–$120.00	+5%	54% 24 analysts	23x*	79%	-0.1%
	Why: Tower and fiber assets with contracted revenue. **Risk:** Leverage; only 54% Buy.								
9	**PSA** Public Storage	38.6	$324.77	$330.06 $285.00–$367.00	+2%	30% 23 analysts	33x*	86%	+2.4%
	Why: Self-storage leader with scale economies. **Risk:** Soft demand; only 30% Buy.								
10	**SPG** Simon Property	38.6	$217.92	$228.89 $205.00–$275.00	+5%	32% 22 analysts	41x*	69%	+1.0%
	Why: Premier mall portfolio with strong occupancy. **Risk:** Retail secular risks; only 32% Buy.								

† Mean target last updated before Sep 15, 2026 (stale; half-weighted). *REIT trailing P/E not meaningful; valuation scored neutral. n/m = negative, >100x or <5x trailing P/E treated as distorted by one-offs.

Also scored, outside the top 10: O 37.0 (#11).
